PROFILE

Full-stack developer with 5+ years of experience, specialized in Flutter mobile development and Laravel/PHP back-end. I have designed and evolved several production applications: a multi-service super-app, fintech solutions (Mobile Money), and web platforms, including a complete e-commerce platform with mobile-wallet payment. Skilled in designing and integrating REST APIs, integrating payment APIs, and publishing apps to Google Play and the App Store. Autonomous and comfortable picking up and extending an existing codebase.

SKILLS

Mobile development: Flutter, Dart, package-based architecture, Google Play Store and App Store publishing.

Back-end & API: PHP, Laravel, REST API design and integration, payment API integration (Mobile Money).

Databases: MySQL, MariaDB.

Web: JavaScript, HTML, CSS, Blade.

DevOps & Cloud: Docker, Google Cloud Platform, Git, GitHub.

Advanced features: Google Maps and geolocation, real-time (WebSocket), Firebase, push notifications, payments and QR codes.

AI: AI-assisted development with Claude Code (code generation and review, refactoring, debugging) built into the daily workflow.

Currently learning: Node.js, TypeScript, React, microservices architecture, CI/CD, Nginx.

Languages: French (native), English (technical).

PROFESSIONAL EXPERIENCE

Mobile App Developer February 2024 – September 2026

2GO SARL, Lomé, Togo

- Evolving and maintaining MonKapi, a multi-service super-app (ride-hailing with dynamic pricing, delivery, e-food, e-commerce, beauty-salon booking, laundry, pharmacy), autonomously picking up and extending a large existing codebase. (Flutter, Provider/GetIt)
- Designed and built KapiMarket, a classifieds module built from scratch: listings with dynamic fields and up to ten photos, category search and browsing, buyer/seller chat and negotiation, seller reviews and favorites.
- Built the beauty-salon booking module: time-slot and appointment management, service and product catalog, mixed cart.
- Built the e-wallet (top-up, transfers between contacts), the points-based loyalty program, promo codes, and secure sign-up with server-side OTP verification.
- Led the progressive rollout of a unified light/dark theme system across the entire app (10+ modules).
- Built TamTamCash, a two-app Mobile Money ecosystem (consumer and agent/branch): payment API integration, P2P transfers, cash-in/cash-out, QR code payments, KYC. (Flutter, REST API)
- Built MonKapi Merchant, an app for merchants and service providers: catalog management (products and services, variants, discounts, stock), appointment calendar, delivery assignment, sales dashboard, push notifications (Firebase Cloud Messaging), bilingual French/English interface.
- Built Ticket Scanner, real-time QR code event access control. (Flutter)
- Published apps to Google Play Store and the App Store, and maintained releases.

Published apps: play.google.com/store/apps/details?id=com.togo.user — play.google.com/store/apps/details?id=com.monkapi_merchant

Web & Mobile App Developer June 2022 – January 2024
Cyberdix / Youaps, Lomé, Togo

- Back-end development (PHP) and integration: the Youaps website, a data-management web app, and a partner sign-up site.
- Designed the You (customers), You Pro (service providers) and You Commercial mobile apps. (Flutter)

Published apps: play.google.com/store/apps/details?id=com.cyberdix.you — play.google.com/store/apps/details?id=com.cyberdix.youpro

App Developer Intern January – April 2022
Markom Business Solutions, Lomé, Togo

- Designed and built a complete e-commerce platform (product catalog, cart, checkout, stock and invoicing management), built on a Repository/Service layered architecture and covered by an automated test suite (PHPUnit). (Laravel, MySQL, Blade)
- Integrated the PayGate payment gateway for mobile-wallet checkout (Mixx, Flooz), with transaction security and order-status tracking.
- Updated the company's official website markom-bs.com. (WordPress)

PERSONAL PROJECTS

- **Gestion Bulletin (ESIBA)** — Web platform for school report-card management (grade entry, PDF generation, imports/exports, timetables), with a REST API and a Flutter mobile app. (Laravel, REST API, MySQL, Flutter) — bulletin.esiba.tg
- **Stay High** — Streetball tournament management platform (draws, brackets, stats, standings). Laravel back-end + API, deployed in production. (Laravel, REST API, MySQL) — stayhigh.africa
- **Canapé Shop and Vehicle Rental** — Online ordering e-commerce sites (catalog, cart, order management). (Laravel, Blade)
- **Chopper's Yogurt** — Premium one-page showcase site. (HTML, CSS)

EDUCATION

Professional Bachelor's Degree in Software Engineering 2020 – 2021
Institut Polytechnique DEFITECH, Lomé, Togo

BTS (Higher Technician Certificate) in Application Development 2018 – 2020
Institut Polytechnique DEFITECH, Lomé, Togo

Baccalauréat, Science Track (série D) 2015 – 2018
Collège Protestant Agbalépédo, Lomé, Togo
